animation-direction controls the order of the sequence. The default value is normal, going from 0% to 100% over the course of the specified duration.. We can also set it to reverse.This will play the animation backwards, going from 100% to 0%. The interesting part, though, is that we can set it to alternate, which ping-pongs between normal and reverse on subsequent iterations.

### 31 Bootstrap Animation Examples To Make A Meaningful Design

2D animation is when scenes and characters are animated in a 2D space instead of a 3D environment. Today, artists use computer software to create everything in a 2D animation, including environments, characters, visual effects, and more. For most of the 20th century, the animation was done by taking photographs of drawings on paper and then placing them on transparent acetate sheets called cels.
