Cervical Cancer The Essential Guide

This publication, Comprehensive cervical cancer control: a guide to essential practice (C4GEP), gives a broad vision of what a comprehensive approach to cervical cancer prevention and control means. In particular, it outlines the complementary strategies for comprehensive cervical cancer prevention and control, and highlights the need for collaboration across programmes, organizations and partners.

WHO | Comprehensive cervical cancer control

Cervical cancer is a type of cancer that occurs in the cells of the cervix — the lower part of the uterus that connects to the vagina. Various strains of the human papillomavirus (HPV), a sexually transmitted infection, play a role in causing most cervical cancer.

Cervical cancer is a cancer arising from the cervix. It is due to the abnormal growth of cells that have the ability to invade or spread to other parts of the body. Early on, typically no symptoms are seen. Later symptoms may include abnormal vaginal bleeding, pelvic pain or pain during sexual intercourse. While bleeding after sex may not be serious, it may also indicate the presence of ...

Cervical cancer - Wikipedia

Cervical Cancer Cervical cancer can often be found early, and sometimes even prevented entirely, by having regular Pap tests. If detected early, cervical cancer is one of the most successfully treatable cancers.

Cervical Cancer - American Cancer Society

The main elements in the new guidance are: Vaccinate 9 to 13-year-old girls with two doses of HPV vaccine to prevent infection with the Human papillomavirus (HPV), the virus responsible for most cases of cervical cancer. The reduced, 2-dose schedule has been shown to be as effective as the current 3-dose schedule.

How Can You Prevent Cervical Cancer? | HPV Vaccine Preventing, detecting, and treating pre-

cancers before they become cervical cancer is the key. Regularly getting a Pap test and HPV (human papillomavirus) test is essential—the results can alert you to potential health issues caused by HPV or precancerous cells.

How Can You Prevent Cervical Cancer? | HPV Vaccine

If cervical cancer is suspected, your doctor is likely to start with a thorough examination of your cervix. A special magnifying instrument (colposcope) is used to check for abnormal cells. During the colposcopic examination, your doctor is likely to take a sample of cervical cells (biopsy) for laboratory testing.
