Solved Example Problems for Regression Analysis - Maths

Age Problems Example 5: Mary's father is four times as old as Mary. Five years ago he was seven times as old. How old is each now? 1. The problem involves age. 2. The question asks, "How old is each now?", which means it's asking for the ages of both Mary and her father. 3. Let Mary's current age M and her father's current age F .

Solving Word Problems - Metropolitan Community College

Video Lessons - More Examples Age Word Problems. Example: Mary is 3 times as old as her son. In 12 years, Mary's age will be one year less than twice her son's age. Find their ages now. Note that this problem requires a chart to organize the information. The rows of the chart can be labeled as Mary and Son, and the columns of the chart can ...

Algebra: Age Problems (video lessons, examples and solutions)

Because of the inherent psychometric problems associated with age and grade equivalents that seriously limit their reliability and validity, these scores should not be used for making diagnostic or placement decisions (Bracken, 1988; Reynolds, 1981).The reliability of age- and grade-equivalent scores is limited by the relationship between the equivalents and the raw scores on which they are based.

Interpretation Problems of Age and Grade Equivalents

The following example uses both a global and a local declaration. In this case, the `mediaType` node defines acceptable media types as `application/json` and `application/xml`.The first type, `Person`, returns a body that is in either media type.However, the second type, `Another`, overrides the global declaration with a local one, and returns only a JSON body.

Common Problems Found in RAML 1.0 API Specifications ...

When solving age problems, generally the age of two different people (or objects) both now and in the future (or past) are compared. The objective of these problems is usually to find each subject's current age. Since there can be a lot of information in these problems, a chart can be used to help organize and solve. An example of such a ...
