The GM Generation I and Generation II (LT) engine families are both derived from the longstanding Chevrolet small block V-8. The Generation III small-block V-8 was a "clean sheet" design, which replaced the Gen I and Gen II engine families in 2002 and 1995 respectively.. Like the previous two generations, the Buick and Oldsmobile small blocks, the Gen III/IV can be found in many different brands.

General Motors LS-based small-block engine - Wikipedia

The very last of the VZ Commodores also ushered in the L76 version of the LS engine which was a full 6.0 litres in capacity and provided a slight increase in power to 260kW, but a bigger torque increase to 510Nm. Closely related to what's also known as the LS2 engine, the L76 was a true workhorse version of the LS concept.
