INTRODUCTION. Health is defined as "a state of complete physical, mental, and social well-being and not merely an absence of disease or infirmity" by World Health Organization (WHO). 1 To improve health, the promotion of health, prevention of disease, impairment, and disability, and the treatment of disease are required. However, the values of mental health promotion and illness prevention ...

Functionalism: James opposed the structuralist focus on introspection and breaking down mental events to the smallest elements. Instead, James focused on the wholeness of an event, taking into the impact of the environment on behavior. James-Lange Theory of Emotion: The James-Lange theory of emotion proposes that an event triggers a physiological reaction, which we then interpret.

The ovary is an organ found in the female reproductive system that produces an ovum. When released, this travels down the fallopian tube into the uterus, where it may become fertilized by a sperm. There is an ovary (from Latin ovarium 'egg, nut') found on each side of the body. The ovaries also secrete hormones that play a role in the menstrual cycle and fertility.
