Pesticide use raises a number of environmental concerns. Over 98% of sprayed insecticides and 95% of herbicides reach a destination other than their target species, including non-target species, air, water and soil. Pesticide drift occurs when pesticides suspended in the air as particles are carried by wind to other areas, potentially contaminating them.

Pesticide - Wikipedia

Eating animals that have been well treated, well fed and let free to graze on pastures all day long are healthy.
