As an alternative to using the SQL Developer graphical interface for formatting a .sql file or all .sql files in a directory or folder, you can use the command line. Before invoking the command-line interface for SQL formatting, start the SQL Developer graphical interface, so that the Database: SQL Formatter preferences (which are used for the ...

SQL Developer Concepts and Usage

In this chapter, we will discuss the DBMS Output in PL/SQL. The DBMS_OUTPUT is a built-in package that enables you to display output, debugging information, and send messages from PL/SQL blocks, subprograms, packages, and triggers. We have already used this package throughout our tutorial. Let us look at a small code snippet that will display all the user tables in the database.
